

PRESS RELEASE

SILICON TURNKEY SOLUTIONS ACQUIRES SANTA CLARA TEST OPERATIONS OF WYLE

MILPITAS, California – March 20, 2008; Silicon Turnkey Solutions (STS) Inc. today announced the successful acquisition of the Santa Clara Test Operations of Wyle Laboratories. STS will operate this business as a separate division under the new name of 'Hi-Rel Microelectronics'. Ackrell Capital, LLC acted as the financial advisor for STS in connection with this transaction.

STS and Hi-Rel Microelectronics share a common vision to channel their synergistic expertise, their multiple market customer reach, STS' new generation equipment and higher efficiencies to inspire innovative solutions and technological growth in the years ahead.

“We’ve made great strides in the realm of Testing and Qualification in a very short time.” Zef Malik, the CEO of STS commented. “This acquisition will provide us the leverage to enter markets for Parts Managements and Hi-Reliability Value-added Up screening and bolster STS' existing Test capabilities, bringing both immediate and longer-term value to our customers and strategic partners.”

About Wyle Laboratories

Wyle is a leading provider of high tech aerospace engineering and information technology services. The company provides life sciences services for NASA's astronaut corps as well as mission critical support including launch services and space simulation; test and evaluation of aircraft, weapon systems and networks.

About Santa Clara Test Operations

The Santa Clara Test Operations serves the Aerospace, Military and Commercial Electronics Industries offering comprehensive services for virtually any test requirement of IC's, including Memory Testing, Plastic Screening and high-volume Test support.

About Silicon Turnkey Solutions

Incorporated in 2001, Silicon Turnkey Solutions Inc. has established itself as a leading-edge provider of Specialty Assembly, Reliability, Qualification and Electrical Test services, serving a broad spectrum of customer bases.

As a trusted collaborative partner and with a proven track record, STS continues to be on the technological forefront by utilizing the most sophisticated Test & Reliability equipment and high level in-house Project management & Engineering expertise.

STS is recognized as a leader in providing innovative and cost competitive turnkey solutions for complex 3D and highly integrated Microelectronic devices such as SIP's, MEM's, SOC, Flip Chip & ASIC's.
